Author Index

Bauer, J.
Electrophoretic separation of cells 359
Beaty, N.B.
— and Mello, R.J.
Extracellular mammalian polysaccharides: glycosaminoglycans and proteoglycans 187
Bischoff, R., see McLaughlin, L.W. 51
DeWald, D.B., see Pearson, J.D. 245
Dunn, M.J.
Two-dimensional gel electrophoresis of proteins 145
Elton, T.S., see Reeves, R. 73
Hearn, M.T.W.
General strategies in the separation of proteins by high-performance liquid chromatographic methods 3
Hecker, R.
— and Riesner, D.
Chromatographic separation of DNA restriction fragments 97
Huisman, T.H.J.
Separation of hemoglobins and hemoglobin chains by high-performance liquid chromatography 277
McCroskey, M.C., see Pearson, J.D. 245
McLaughlin, L.W.
— and Bischoff, R.
Resolution of RNA using high-performance liquid chromatography 51
Mello, R.J., see Beaty, N.B. 187
Pearson, J.D.
—, McCroskey, M.C. and DeWald, D.B.
Separation of protein hormones 245
Reeves, R.
— and Elton, T.S.
Non-histone chromatin proteins that recognize specific sequences of DNA 73
Regnier, F.E.
Chromatography of complex protein mixtures 115
Riesner, D., see Hecker, R. 97
Serwer, P.
Agarose gel electrophoresis of bacteriophages and related particles 345
Tietz, D.
Electrophoresis of intact subcellular particles 305
Van der Zee, R., see Welling, G.W. 223
Wehr, C.T.
Sample preparation and column regeneration in biopolymer separations 27
Welling, G.W.
—, Van der Zee, R. and Welling-Wester, S.
Column liquid chromatography of integral membrane proteins 223
Welling-Wester, S., see Welling, G.W. 223
Zee, R. van der, see Welling, G.W. 223
